

FTIR TRAINING COURSES

Protea offer training courses on various aspects of the use of FTIR for stack emissions monitoring.

Course 1 - Introduction to FTIR

This course aims to provide a generic introduction to FTIR technology suitable for all current or potential users of any FTIR analysers. The following syllabus is covered:

- **Why Use FTIR?**
- **Explanation of FTIR and its uses**
- **IR spectra and basic analysis**
- **Performance parameters of FTIRs**
- **Equipment available (from common manufacturers)**
- **Permanent / Periodic monitoring and MCERTS**
- **An introduction to ASTM D6348 method**

Protea also runs the following additional FTIR courses:

Course 2 - Advanced analysis of FTIR Spectra

Course 3 - Use of the Protir FTIR analyser

Course 4 - Implementation of the ASTM D6348 Method

All training courses are held regularly at Protea offices in Crewe, Cheshire however, on-site training courses can be arranged anywhere in the UK by special arrangement.
